RESULT 36
S57960
C4BP protein beta chain precursor - rat
C;Species: Rattus norvegicus (Norway rat)
C;Date: 13-Jan-1996 #sequence_revision 19-
C;Accession: S57960
R;Hillarp, A.; Thern, A.; Dahlback, B.
submitted to the EMBL Data Library, July 1
A;Description: Molecular cloning of rat C4
A;Reference number: S57953
A;Accession: S57960
A;Status: preliminary

Sequence 357, Application PC/TUS0223913

GENERAL INFORMATION:

APPLICANT: Millennium Pharmaceuticals, Inc. et al.

APPLICANT: Millennium Pharmaceuticals, Inc. et al.

TITLE OF INVENTION: NOVEL GENES, COMPOSITIONS, KITS, AND

TITLE OF INVENTION: METHODS FOR IDENTIFICATION, ASSESSMENT, PREVENTION, AND

TITLE OF INVENTION: THERAPY OF PROSTATE CANCER

FILE REFERENCE: MRI-044PC

CURRENT APPLICATION NUMBER: PCT/US02/23913

CURRENT FILING DATE: 2002-07-25

PRIOR APPLICATION NUMBER: 60/307,982

                                                                                                           Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              seq length: 0 seq length: 2000000000
